

ART IN YOUR HANDS

by EXPOTOUR ITINERANT

An immersive artistic experience guided by the Innovators within the universe of Windows to Infinity.

"Art in Your Hands" is not just a creative masterclass: it is a gateway into the universe of Windows to Infinity, where each participant becomes the protagonist of art, technology, and imagination.

During an intense experience of approximately 3 hours, youths and children will create their own work inspired by the thematic worlds of Windows to Infinity. They will be able to choose from the visual universes—ranging from futuristic landscapes and mythological realms to legendary creatures—and bring to life a diorama or model with high visual impact.

Everything is designed so that any child, regardless of their artistic level, can complete a beautiful creation to take home as a keepsake and a work of their own making.

GUIDED BY THE INNOVATORS

The artists and technicians of Innovators in Action, known for their live shows and installations in Expo-tour Itinerant, will be the mentors and instructors in each session.

They will not only teach painting, composition, and set design techniques, but they'll also turn the class into an authentic show filled with energy, music, and excitement. Participants will not only learn—they will experience art as if they were part of a live concert.

EXPERIENCE

Art in Your Hands is much more than a workshop: it is an educational, artistic, and theatrical experience designed for children and young people, where they become the true protagonists of art. In an immersive and stimulating environment, they will learn creative techniques from the Innovators in a fun and engaging way.

The activity is carried out in three exciting phases:

1. Inspiration: presentation of 4 basic painting and sculpting techniques, introduction to the 10 visual worlds of Windows to Infinity, and selection of the favorite universe.
2. Creation: work in a scenic space with pre-made materials, guided step-by-step by the Innovators. Creation of pieces from scratch, addition of details and final decoration.
3. Celebration: preparation of the work to take home, professional photo at the virtual photocall, and projection of the process on giant screens.

**A unique and different workshop:
designed to experience the complete creative process and achieve a professional art piece.**

WHAT MAKES THIS EXPERIENCE UNIQUE?

- Access to exclusive practical art know-how, and craft knowledge from the Innovators.
- Introduction to material based on characters and worlds from the Windows to Infinity universe.
- Pre-designed pieces for high-quality results in little time, without restricting creativity.
- Immersive environment with music, lights, and show.
- Final creation ready to take home.
- Innovator Certification of course completion.
- Virtual photocall to capture photos with the created work and chosen Windows to Infinity character.
- Audiovisual content for social media.
- Discovery and encouragement of artistic vocations.

WE BRING THE EXPERIENCE ANYWHERE

At Art in Your Hands, we are ready to bring the experience to any space, indoors or outdoors.

Our team takes care of everything: transport, setup, ambiance, and dismantling.

We count with refurbished containers fully equipped as mobile workshops, allowing us to set them up in record time and adapt to the conditions of each event.

We offer endless creative and logistical solutions so the experience can be lived with the same intensity anywhere.

Formats and venues where it can be held:

- Fairs and festivals.
- Science, art, and technology museums.
- School events and educational programs.
- Cultural activities.
- Team building in creative companies.
- Portable format for shopping centers and urban events.
- Public spaces with institutional or private support.
- Perfect complement to the Windows to Infinity exhibition.

TECHNICAL AND HUMAN RESOURCES

- Individual and fully equipped creative stations.
- Pre-made artistic materials.
- Innovators as artistic and scenic guides.
- Lighting, music, and ambient sound.
- Audiovisual recording and delivery of photocall pictures.
- Integration of the aesthetics and stories of the Windows to Infinity universe.

A CREATION, A STORY, A MEMORY

In a short time, participants not only learn techniques: they awaken their imagination, bring out their inner artists, and connect with their emotions... taking home a unique art piece created with their own hands.

Art in Your Hands is more than a workshop: it is a gateway to different creative areas, a factory of artistic callings, and an experience that leaves a mark.

THE ORIGIN

Art in Your Hands was born from a crystal-clear conviction: every child holds an artist within, and our mission is to help them discover it.

The seed of this project emerged in the creative workshop of Ramón Colomer, creator of the Windows to Infinity universe. For years, Ramón opened the doors of his studio to the children of friends and visitors. There, among brushes, clays, colors, and models, children experienced the magic of creating with their own hands.

In just one hour, they would go from initial curiosity to completing beautiful art pieces, full of detail and personality. They would leave with a unique creation and a proud smile, while their parents watched with emotion as shyness transformed into enthusiasm and artistic expression.

Those sessions proved that art, when experienced firsthand in an inspiring environment, can become a driving force for confidence and creativity.

Today, the combination of that experience and the Windows to Infinity universe, has given rise to Art in Your Hands: a unique proposal that unifies art, imagination, and fantastic worlds so that anyone can live the creative process firsthand.

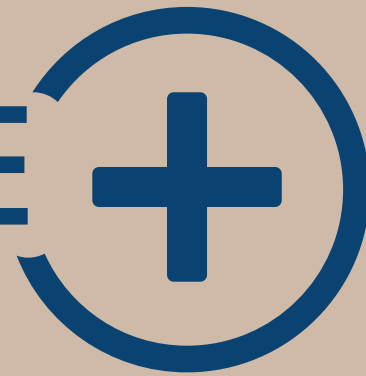

PHASE

Art in Your Hands is currently in the prototype and study phase.

We are fine-tuning every detail to guarantee the highest quality of experience and its adaptation to different spaces and formats.

The official launch date is scheduled for 2026, when the public will be able to fully enjoy this proposal that unites art, imagination, and live performance.

**COMPLETE
YOUR EXPERIENCE
WITH**

Windows to Infinity

An immersive exhibition that transforms art into a sensory journey.

indows to Infinity combines monumental scenery, interactive echnology, and visual storytelling to immerse visitors in fantastic worlds.

Each space is a window to the impossible, designed to inspire, ignite the imagination, and connect with audiences of all ages. Touring, adaptable, and deeply artistic, it is much more than an exhibition: it is a living experience that leaves a lasting mark.

Innovators in Action

Live art turned into a show.

A live performance where the Innovators are the absolute protagonists. On a large stage surrounded by giant screens, spectacular lights, and live music, the audience witnesses the creation of great works of art in real time.

Painting, sculpting, 3D printing, visual effects, and technology merge in a unique experience that combines the rhythm of the show with the emotion of art in action.

More than an exhibition, it's a cross between a concert and a tech show, where each performance is unique and every work is a shared moment with the public.

Infinity Studios

Ideas transformed into experiences.

An artistic and technical production company specializing in the creation of content, sets, and immersive experiences.

Infinity Studios is the creative and operational engine of Expotour Itinerant. From here we conceptualize, design, and produce sets, installations, special effects, interactive solutions, and audiovisual content for exhibitions, museums, brands, and cultural projects.

Commitment to Culture

At Expotour Itinerant, we understand culture as an essential, shared asset. That's why our work is based on values such as accessibility, sustainability, and inclusion.

We promote the creation of exhibitions that are accessible to all audiences, with universal design and multisensory resources, while reducing our ecological footprint through recyclable materials and low-energy technology.

Commitment to the Planet

An Exhibition with Environmental Awareness

From the very beginning, Art in Your Hands were born with a crystal-clear idea: to create impactful artistic experiences without leaving a negative footprint on our environment. Our exhibitions not only aim to touch hearts... they also seek to respect **the heartbeat of the Earth.**

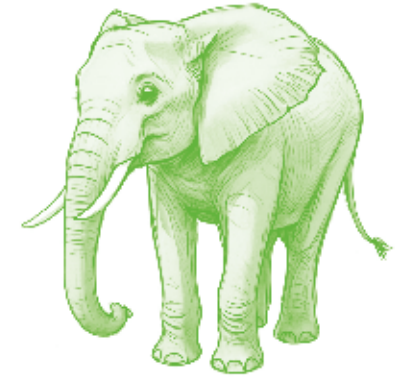

That is why we have pushed our ingenuity to the limit to **reuse, recycle**, and give new life to everything others would discard:

- Reused industrial containers transformed into spectacular scenic spaces. Instead of manufacturing from scratch, we have chosen to **restore.**
- **Vegetation rescued** from areas undergoing cleaning or pruning, relocated to form part of natural, soulful sets.
- **Recycled scenic materials:** wood, metal, fabric, glass... if anything can have a second life, it finds it here.
- Dismountable modular structures, designed **to travel without leaving a trace**, without generating waste, without damaging the places that host us.
- Low-consumption technology, LED lights, optimized audio systems, and smart programming to **reduce energy use.**
- **Reusable packaging**, even within our internal setup and dismantling warehouse.
- Handcrafted decorations made from **sustainable materials**, or reclaimed from old theatrical and audiovisual installations.

Every detail of our exhibitions has been conceived with **deep responsibility:** to create art that does not destroy, but transforms.

Our future is built with respect.

Art can also be ecological. Beauty can also be sustainable. And Art In Your Hands proves it in every corner, in every decision, and in every creation. Thank you for being part of this **silent revolution** that seeks to inspire... without polluting. **without polluting.**

Art with Purpose:
Our Message for the Planet

That's why, in addition to the effort to reuse materials, reduce environmental impact, and build exhibitions committed to sustainability, we wanted to go one step further and **move consciences**.

Within "Our Planet", a special category in the Windows to Infinity exhibition, two of the visions were created with a clear and urgent mission:

- **A Sustainable Journey**
- **Echoes of Prehistory**

Both visions address crucial issues about the future of the Earth. Through emotion, beauty, and narrative power, they evoke a call to action.

Their purpose is not only to move, but to touch the heart of the visitor, awaken their awareness, and leave a lasting impression.

Because we believe that art has the power to transform, to spark small but meaningful decisions. And if this exhibition can inspire even a single more conscious gesture, a single new way of looking at the world we share...

Then it will all have been worth it.
